PRO TURBO POLISH

High Speed Polisher Only*

Designed for the unique, rugged needs of the commercial stone grinding and polishing market, the **PRO POLISHER/GRINDER** is the Ultimate Stone Restoration Machine featuring the most powerful 2 hp 184 frame sealed motor on the market, that resists moisture penetration and is ideal for grinding and polishing in harsh conditions. For dry grinding and polishing, the **PRO POLISHER/GRINDER** excels with the **Xtreme** transmission featuring triple planetary gears and a heavy duty metal shear pin, sealed motor and dust control. With an easy to clean rigid cast aluminum frame & added weight capacity of 220lbs., this 17" **PRO POLISHER/GRINDER** can be used for cleaning, crystallization, wet or dry polishing or diamond grinding of marble, granite, limestone, concrete, terrazzo, and other stone surfaces. Designed specifically to compete on a professional level on a modest budget.

TURBO YOUR PRO POLISHER/GRINDER

The **PRO POLISHER/GRINDER** is ideal for most jobs with 4, 6, or 9 4" planetary heads turning 600 RPM. It has good production, versatility and is easy to use.

For the more advanced user we offer the **TURBO** version (high-speed) with planetary heads spinning 900-1200 RPM, allowing the operator to finish the same square footage in half the time. Great for large jobs or where a fast turnaround is a must.

*Caution: The Pro **TURBO** Polish must be used by an experienced operator and can be used only for Polishing. It can NOT be used for Surface Prep.

PRO POLISHER/GRINDER 17" 178RPM | KEPS17
PRO POLISHER/GRINDER 20" 178RPM | KEPS20
PRO TURBO POLISH 17" 300RPM | KEPSTURBO

PLANETARY HEADS The **SATELLITE** and **PREDATOR** systems are high productivity accessories featuring 4, 6, or 9 counter-rotating heads that spin at 600 RPM with a 178 RPM machine and 1200 RPM with a 300 RPM machine. This provides a faster polish with fewer scratches and increases diamond life by 30-40%. Works up to 6 TIMES faster than a conventional pad driver, saving significant labor, time and money. Water fed through the disc lubricates and cleans diamond pucks.
