## CENO's TOTAL DUST CONTROL

CENO's exclusive  
**Cyclonic Vacuum System**  
uses an elliptical design to equalize vacuum pressure 360° to insure the best dust collection. With this elliptical design, we are able to use a narrow 3/16" gap and insure consistent vacuum pressure around the entire sanding head. With this system, we employ one vac port maximizing air flow; in a two-port system air flow is divided.
